doug@forumfg.com

Doug: my preference is to meet on Monday to give us extra time to prepare for the CAG meeting. Of the times listed, I can meet from 10:30 to 11:30 on Monday and Tuesday at 11:30.

We definitely need to spend some time talking about "stakeholder" Mary Lou. She is with Bonjiorno Productions. I expect she will have a camera and will be filming the CAG meeting for her movie about the dioxin removal project. Among other things Mary Lou has outright stated that EPA should have evacuated the north ward of Newark due to air quality problems and she claims to be extremely worried about whether her vegetables are safe to eat. The EPA federal on scene coordinator for the removal project, Michael Hoppe, was interviewed by Mary Lou and her husband once or twice. Michael strongly suspects he was recorded. Liz Butler and I were both contacted by Mary Lou. During all of the conversations we tried very hard to inform Mary Lou about the project, the location of data on the www.passaicremovalaction.com Web site, maps where she could see the locations of air monitoring stations, etc. Whether she gets time on the agenda or not is not EPA's decision. We leave that to the CAG leadership. Neither Liz Butler nor Michael Hoppe will be at the CAG meeting. Alice and I can give a very general reply to Mary Lou's questions but we will not engage in a back and forth with her at the CAG meeting. We will have a more in-depth CAG briefing on the removal project at the September 13 CAG meeting, just so everyone's aware of the dynamics behind Mary Lou's request.

Subject: Time to chat on Monday or Tuesday

Hi,

Carol, Debbie and I will be coordinating next week in advance of the meeting, we can do Monday any time between 9:30 and 11:30am or Tuesday between 11:30 and 12:30, do either of those times work for you?

Also, Carol and Debbie have identified the following items for the agenda, I think only the last one is something we did not anticipate at this time.

- Update on the identification of hot spots upriver
- Update on the Lyndhurst hot spot removal, including decontamination technology testing status

- Status of FFS and NRRB meeting
- Discussion on NRRB letter -- briefing to group on subcommittee meeting and need to find out what TAG receipt is doing
- Finalize TASC request
- We would like to know the cost of the 40,000 cubic yard removal. We would also like to know who paid towards the \$20 million for the Lyndhurst cleanup (this might have been in the press release from EPA...)

Also, ICC has been contacted by Mary Lou, who identified herself only as a concerned stakeholder with odor concerns and asked for time on the agenda

thanks
Doug
